Certification that the carrier is able to function in emergency situations

Ace Telephone Association (Carrier) is able to remain functional in an emergency situation through the use of back-up power to ensure functionality without an external power source. Carrier has backup battery reserve which enables it to provide service for a minimum of eight hours. Carrier's service is consistent with requirements and the obligations to provide service in emergency situations as set forth in § 54.202(a)(2).

Carrier's network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations. Carrier has redundancy in its network for use in re-rerouting traffic when facilities are damaged.

Pursuant to Minnesota Administrative Rule "7810.390 Emergency Operations" Carrier has:

- Established reasonable provisions to meet emergencies resulting from failures of lighting or power service, sudden and prolonged increases in traffic, illness of operators or from fire, storm or acts of God including provisions for emergency power that meet or exceed the rule requirement to provide:
 - A minimum of four hours of battery service in each central office
 - o A permanently installed power unit in exchanges exceeding 5,000 lines
 - Mobile power units that can be delivered on short notice and which can be readily connected in offices without installed emergency power facilities
- Has informed employees as to the procedures to be followed, including reasonable rerouting of traffic around damaged facilities and the deployment of emergency power in the event of emergency in order to prevent or mitigate interruption or impairment of telecommunications service.
